- 2012 - 2015 Faculty of Commerce, Cairo University, Egypt
MSc. of Business Administration – Finance Discipline
Thesis Title: ‘Predicting Stock Market Index Using an Artificial Neural Network Model (ANN): The Case of Egyptian Stock Exchange’
- 2008 - 2011 Faculty of Commerce, Cairo University, Egypt
BSc. of Business Administration – English Section
Grade: Very good

RESEARCH

In terms of research my main interests lie in the area of behavioural anomalies and banking which led me to undertake a PhD in Finance at Heriot Watt University. I have been awarded my PhD degree in December 2019. My PhD research has produced a set of good quality data which has been drafted into three papers, the first of which has been published in the *Investment Management and Financial Innovations* Journal. The second paper which focuses on ‘Maze Runners: Stock Market Sentiment and Bank Deposits in the UK’, is currently under review in the *Journal of Financial Services Research* (ABS 3-rated). The third paper on ‘Herding Behaviour and Lending Strategies: Evidence from the UK Commercial Banks’, has been submitted to the *International*

Journal of Finance & Economics (ABS 3-rated) and got a “revise and re-submit” decision. In addition to these papers I am currently working on two other projects that will be submitted to high ranking ABS journals by the end of 2019. With respect to research, I am a committed researcher and actively engaged in research activities.

Published work
